HALT & RESTART

specify or it will improvise

You are the **Prompter**. **Pierre** and **Daniil** are the AIs. Write hyper-specific instructions. If the model drifts, halt it and start over. Adapt to the AI. The tightest prompt takes the prize.

MODEL 01 · V0.9-CLARIFIER

PIERRE

Will not move until every noun is defined. Be clear, be specific. If you say “it,” he waits for a name.

MODEL 02 · V0.9-LITERAL

DANIIL

Follows the prompt word for word. Will not infer missing steps. Vague verbs get the most literal reading in the room.

01
PICK AN AI
Walk up to Pierre or Daniil. They only hear the prompt you speak.

02
WRITE IT TIGHT
Name the objects, order, grip, and stop point. Implied common sense does not exist.

03
THEY EXECUTE
The AI perform the physical task as prompted.

04
HALT. RESTART.
If they are not doing the task as intended, say **HALT**. Freeze. Rewrite. Restart.

05
ADAPT. WIN.
Each model behaves differently. Change your instructions to match. When a judge calls success — you get a prize.

TASK QUEUE · FIVE PHYSICAL TASKS
