UNNATURAL GAMES

THE ROOM

HUMANS

One team. Argue the move, then vote — show of hands or a QR poll. Three minutes. Strong players can explain. Beginners still count.

NO CHESS RATING REQUIRED

THE VOTED MOVE

THE SCREEN

MODEL

One language model plays the other side and says why. A moderator reads the reasoning out loud. That is usually the funny part.

PURPOSE

One chessboard. One language model. The whole room plays as a single team — debate the move, vote, and hear the model explain itself. A live look at what current AI can do, and where beginners can still out-plan it.
